

7. Write a java program to print 1 to 10 without using loop

Algorithm:

1. Start
2. Initialize count = 0
3. Calling the function P(). Enter P() function
4. In P() increase the count value by 1.
5. check if (count  $\leq$  10).
6. If 5. is true then print count & again call function P().
7. After 5 condition false it stop

Flowchart:
